

AWS EC2 + Docker Deployment Cheat Sheet

1. CONNECT TO EC2

```
ssh -i 'key.pem' ubuntu@your-ec2-public-ip
```

2. GO TO PROJECT

```
cd /var/www/AEORanker  
ls -a
```

3. CHECK DOCKER CONTAINERS

```
sudo docker ps
```

4. VIEW LOGS

```
sudo docker logs -f aeoranker-app-1
```

5. PULL LATEST CODE

```
git pull origin main
```

6. BUILD & RUN PROJECT

```
sudo docker compose --profile production up -d --build
```

7. CHECK STATUS

```
sudo docker ps  
sudo docker logs aeoranker-app-1
```

8. NGINX CONFIG

```
sudo nano /etc/nginx/sites-available/default
```

9. TEST NGINX

```
sudo nginx -t
```

10. RELOAD NGINX

```
sudo systemctl reload nginx
```

11. CHECK PUBLIC IP

```
curl ifconfig.me
```
